Ergo – SpeedMag Wrapping System

General Characteristics:

VF Ergo – SpeedMag Wrapping System makes it easier, faster and much safer to wrap / unitize loads more effectively. ESM creates a more efficient and productive work environment due to the following characteristics:

- ✓ **Extremely Light Weight:** the operator can wrap the pallet with one hand
- ✓ **Wrap Facing Forward:** forward line of site gives the operator full vision of surroundings and time to stop to potential hazards
- ✓ **Powerful Magnets:** they make ESM easy to access by the operator. They keep stretch film rolls from getting dirty and damaged
- ✓ **Adjust Stretch Film Tension:** the operator can adjust film tension easily on the fly
- ✓ **Adjust Width:** the operator can tailor the width of the tool to the roll

Program Overview:

- ✓ Valfilm commits to provide to its strategic partners **free training** on proper use and care of the ESM unit
- ✓ Valfilm **gives upfront for free** to its strategic partners the Ergo – SpeedMag Wrapping System in exchange for a **stretch film commitment**
- ✓ Valfilm commits to provide **competitive prices** to its strategic partners during the length of the program
